

PURPOSE

The MES Finance Expense Reporting Platform (FERP) is designed to **streamline the financial expense reporting** process for the McMaster Engineering Society by providing a centralized system for **submitting, tracking, and approving expense requests**.

It replaces manual and fragmented processes with a structured, digital workflow that **ensures transparency, efficiency, and compliance** with MES financial policies. The platform integrates **user authentication, request management, and automated email notifications** to facilitate seamless communication between students, approvers, and administrators.

BENEFITS

- Efficiency & Automation** ✓ – Streamlines expense submissions and approvals, reducing manual work and speeding up processing times.
- Transparency & Tracking** ✓ – Users can track request statuses in real time, ensuring clear communication and reducing follow-ups.
- Centralized Record-Keeping** ✓ – Stores all expense data in an organized system, making audits and financial management easier.
- Automated Notifications** ✓ - Keeps users informed with timely email updates on request progress and required actions.

ACKNOWLEDGMENTS

We would like to thank **Luke Schurman** for his constant assistance and support designing FERP to aid the MES as best as possible in its day to day operations. We would also like to thank **Hunter Ceranic** and **Dr. Spencer Smith** for their ongoing feedback to turn FERP into the product it is today.
